- ◆ Eaton powerful hydraulic motor / Rotational torque ensures smooth and positive rotation of the load
- ◆ Drive box and motor are behind the baseplate, which provide max visibility for forklift driver
- ◆ Heavy duty gearbox and rotating bearing provide superior service life
- ◆ 1 piece of truck auxiliary valve is necessary. 140 bar ≤ working pressure ≤ 180 bar
- ◆ Fitting screw M18x1.5. Recommended hydraulic pipe internal diameter = 100mm (3/8")
- ◆ If not requested, rotators are shipped without forks.
